ABOUT ME

I'm a Software Developer specialising in scalable and secure backend systems, focusing on reliable APIs, performance optimisation, and system security.

With a background in full-stack development, I deliver high-quality solutions and solve complex problems in real-world applications.

TECHNICAL SKILLS

Backend Skills: PHP(CodeIgniter), MySQL, RESTful APIs, Node.js, Nest.js

Frontend Skills: Typescript, JavaScript, HTML, CSS, Bootstrap, Tailwind, React, JQuery

Database: MySQL(MariaDB), PostgreSQL, MongoDB ,MSSQL ,Prisma, Redis

Other: Postman, Git, Redis, Linux, Docker, Kafka, Elastic, Web Socket ,JWT

EDUCATION

Silpakorn University

2021

Bachelor of Science (Biology)

GPA : 3.04

EXPERIENCE

Advanced Info Service Public Company Limited (AIS)

Software Developer

Jun 2025 - Present

- Build and maintain scalable, secure backend services using **NestJS**, **TypeScript**, and **microservices architecture**.
- Implemented secure virtual bank registration and authentication using **cryptographic** verification (App Attest, Huawei Integrity, and Android Attestation).
- Develop event-driven systems with **Kafka** for distributed communication.
- Implemented **Redis** for **caching**, rate limiting, and token/device blacklisting, with **Pub/Sub** for real-time event handling.
- Built real-time features using **WebSocket (Socket.IO)**.
- Designed and optimized **MongoDB** schemas and aggregation pipelines.
- Containerized applications with **Docker** and managed deployments via GitHub Actions and ArgoCD (GitOps).
- Managed secrets securely using **Azure Key Vault**.
- Implemented **unit testing**, centralized **logging**, and monitoring with the Elastic Stack (Elasticsearch, Kibana).
- Designed and developed **REST APIs** following clean architecture and best practices.

EXPERIENCE

WinWin Interactive Co., Ltd.

Sep 2022 - Mar 2025

Full Stack Web Developer

- Contributed to the development of a web-based tool system for user input collection, file uploads, transaction handling, ,data storage management and validation data.
- Created APIs using PHP ,Node.js ,MySQL for efficient data querying and transaction processing and Implemented authentication and authorization mechanisms using JWT
- Optimized API performance by implementing client-side data caching and reducing redundant requests.
- Integrated third-party services such as SMS/email providers, Notification, Leaflet map ,Clerk, Telegram Bot and external APIs for seamless functionality.
- Designed and optimized relational database structures for scalable data management
- Implemented automated report generation and dynamic Excel exports for daily, monthly, and yearly analysis.
- Developed UI webpages using Bootstrap and Tailwindcss(Flowbite, Shadcn)
